Blastwave FX Hits Audio Professionals From All Sides With A New 5.1 Surround Library

Detroit, MI – December 15, 2007: Blastwave FX, announces the **release of a new sound effects library called Revolver™.**

Officially **the world's first 5.1 surround sound production elements library**, Revolver is the all in one collection of **1000 Hi-Def 5.1 surround sound** imaging elements, compositions, drones, and trailers created in the critically acclaimed libraries – Blastwave, Radio Meltdown, Drones, and Spoilers, **all on 6 DVDs.**

Whether it's film, television, radio, or video games, with Revolver, **audio professionals can pack their productions with 5.1 surround elements** that puts them way ahead of the competition **and gives them a unique signature** to draw attention to their productions.

Each sound was **originally recorded at 24 bit 96k** to ensure the highest quality for today's production needs then **delivered as 24 bit 48k broadcast .wav files.** And, as with every Blastwave FX sound collection, **each file comes as an additional mp3 for quick referencing.**

Revolver is a **Click N' Drag™ library.** That means that the entire collection can be clicked and dragged onto any hard drive and is conveniently cataloged with **embedded metadata** for easy search and retrieval in **Pro Tools, AVID, SoundMiner, NetMix, iTunes** and other popular sound library search engines. This collection is ready to use right out of the box. No more long searches, ripping, editing, or settling for close enough. With Revolver, audio professionals can get instant access to the highest quality sound effects for any type of production.

Revolver was created by producers and sound designers from the acclaimed Detroit Chop Shop, headed up by Ric Viers, **one of the largest independent producers of sound effects in the world.**

Revolver will be **released on December 15, 2007**, and will be available through **www.blastwavefx.com** for an **introductory price of \$999.** More information on Blastwave FX and other libraries can be found at: **www.blastwavefx.com.**
