

Blastwave FX Introduces Sonopedia 2.0

Detroit, MI – April 4, 2011: Blastwave FX announces the release of **Sonopedia 2.0** – the exciting **upgrade to the encyclopedia of HD sound effects**. Created by Ric Viers, **Sonopedia 2.0 is the professional sound effects library for high definition media production.**

The Sonopedia 2.0 Upgrade Features Include:

- **10,000 New Sound Effects!**
- **Over 400 5.1 Surround Sound Effects**
- **Sound Effects Loops!**
- **More variety in takes** (Distance, Velocity, Duration)
- **The only General HD Sound Effects Library** to include **Production Elements**
- **A new category: Textures** – featuring **sound effects design elements!**

In total, **Sonopedia 2.0 has over 30,000 HD sound effects** pre-installed on an ultra-quiet, **Glyph GT 050Q hard drive** (FireWire 400/800, USB 2.0/eSata), which includes a **3 year warranty from Glyph**, and is **compatible on Mac and PC**. All sounds are **broadcast .wav files** (24/96, 24/48, 16/44.1) and include **mp3 reference files**. That's over **300 GB of sound effects!** Sonopedia 2.0 comes with a search engine that is powered by [NetMix LE Search Software](#), allowing users to **search, audition, and drag n' drop into any project**. Finally, Sonopedia 2.0 is part of the [Comprehensive Lifetime Sound Design Solution](#) from Blastwave FX that gives users [free sound effects and software updates](#) for life.

Sonopedia 2.0 sound effects were **recorded and mastered at 24/96** and are cataloged with **enriched embedded metadata** for easy search and retrieval in **Pro Tools, AVID, SoundMiner, NetMix, iTunes** and other popular sound library search engines. Blastwave FX's Sonopedia 2.0 allows **instant access to the highest quality sound effects** for editors and sound professionals.
